WHAT IS IT?

RIDE AND TIE: The sport of Ride&Tie combines trail running, endurance riding, and most of all, strategy. The objective is to get all three team members (two humans and one horse) across a cross-country course by alternating riding and running. One team member starts out running, the other starts on the horse and rides down the trail as far as they think their partner can run (or walk) and still keep up a decent pace. At that strategic point the rider stops, dismounts, ties the horse to a tree or fence post, and continues down the trail on foot. The team member who started on foot gets to the horse, unties it, mounts, and rides to catch their partner up ahead. When they get to their running team member they can either stop and exchange (which is called a "flying tie"), or ride further up the trail and tie the horse and then continue running. When, where, and how a team exchanges is up to them, and this is where the strategy lies. Every trail runner has their strengths and weaknesses, and the same is true for horses. Factor all this, along with weather conditions and the topography of the course, and you can understand why Ride & Tie is as much mental as physical.
